2.6 Other Amounts

| Page Title			
2.6 Other Amounts			
Page Context / How I Got Here / Page Notes			
After PIN Entry, ON-Us users are shown 1.0 Main Menu screen which uses multi-selection to configure a transaction.			

	Description	Interaction	Rules	Notes
1	Help	On click the help screen is shown/hidden		
2	Page Title/Instruction	None	Instruction/Title TBD	
3	Bill Buttons	On click the bill amount is added to the stack below and to the amount to withdraw.	Only bills that are currently available in the ATM are shown.	*This could show multiple currencies, but that creates UI issues.*
4	- + buttons	On click that bill type is removed/added to the stack below and to the amount to withdraw.		
5	Your Withdrawal so far	As each bill is clicked, it is added to the stack below. That can be animated, can be real bills or just an illustration.	As each bill is added the withdrawal button is updated.	*Note the fee can be included here. If a 'positive OK' is needed, we can maintain the fee notice screen.*
6	Fee Representation	?		*If there is a fee associated, it can be represented the same way the withdrawal is represented.*
7	Withdraw $70	On click the transaction is executed.		
8	EXIT	On click the Exit process is initiated.
