Page Title		
3.1.0.1.1.1 DON'T KNOW		
Page Context		
This measurement dialog is shown when the user chooses 'Don't Know' on body type.		
Page Notes		
#	Interface Description	Interaction
1	Don't Know	The user has chosen Don't Know and this expanded interface is shown.
2	Illustration	An illustration shows where the measurements are on a woman's body.
3	Measurement sliders	The user can slide the measurement widgets from left (smaller) to right (larger). As these measurements change the body type recommendation is shown.
4	Body Type Recommendation	As the user moves the measurements, the recommended body type indicator is shown/moved to the correct body type.

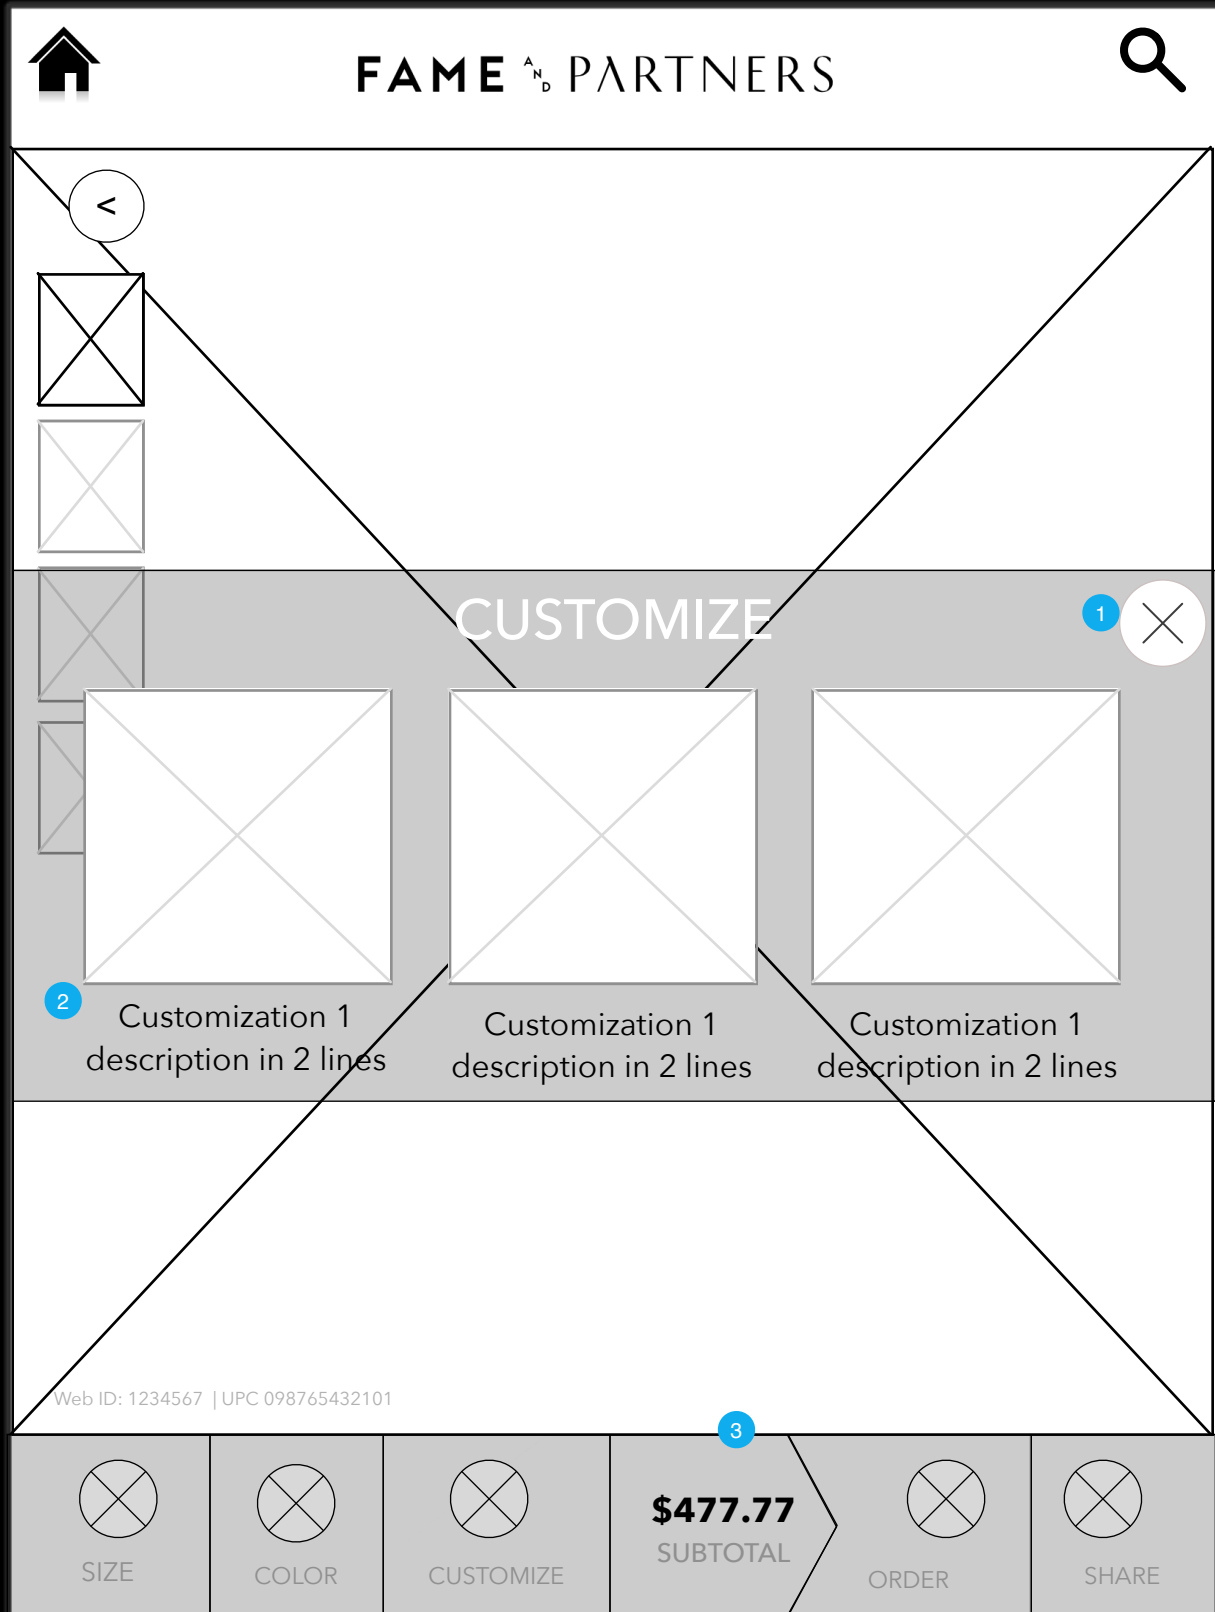

3.1.0.1E Order w/out Size

Page Title		
3.1.0.1E Order w/out Size		
Page Context		
Fit is required to order. If the user tries to order a dress without choosing size variables, this error is shown.		
Page Notes		
#	Interface Description	Interaction
1	Error Message	The icon from the toolbar is repeated and used as a finger control for moving the overlay.

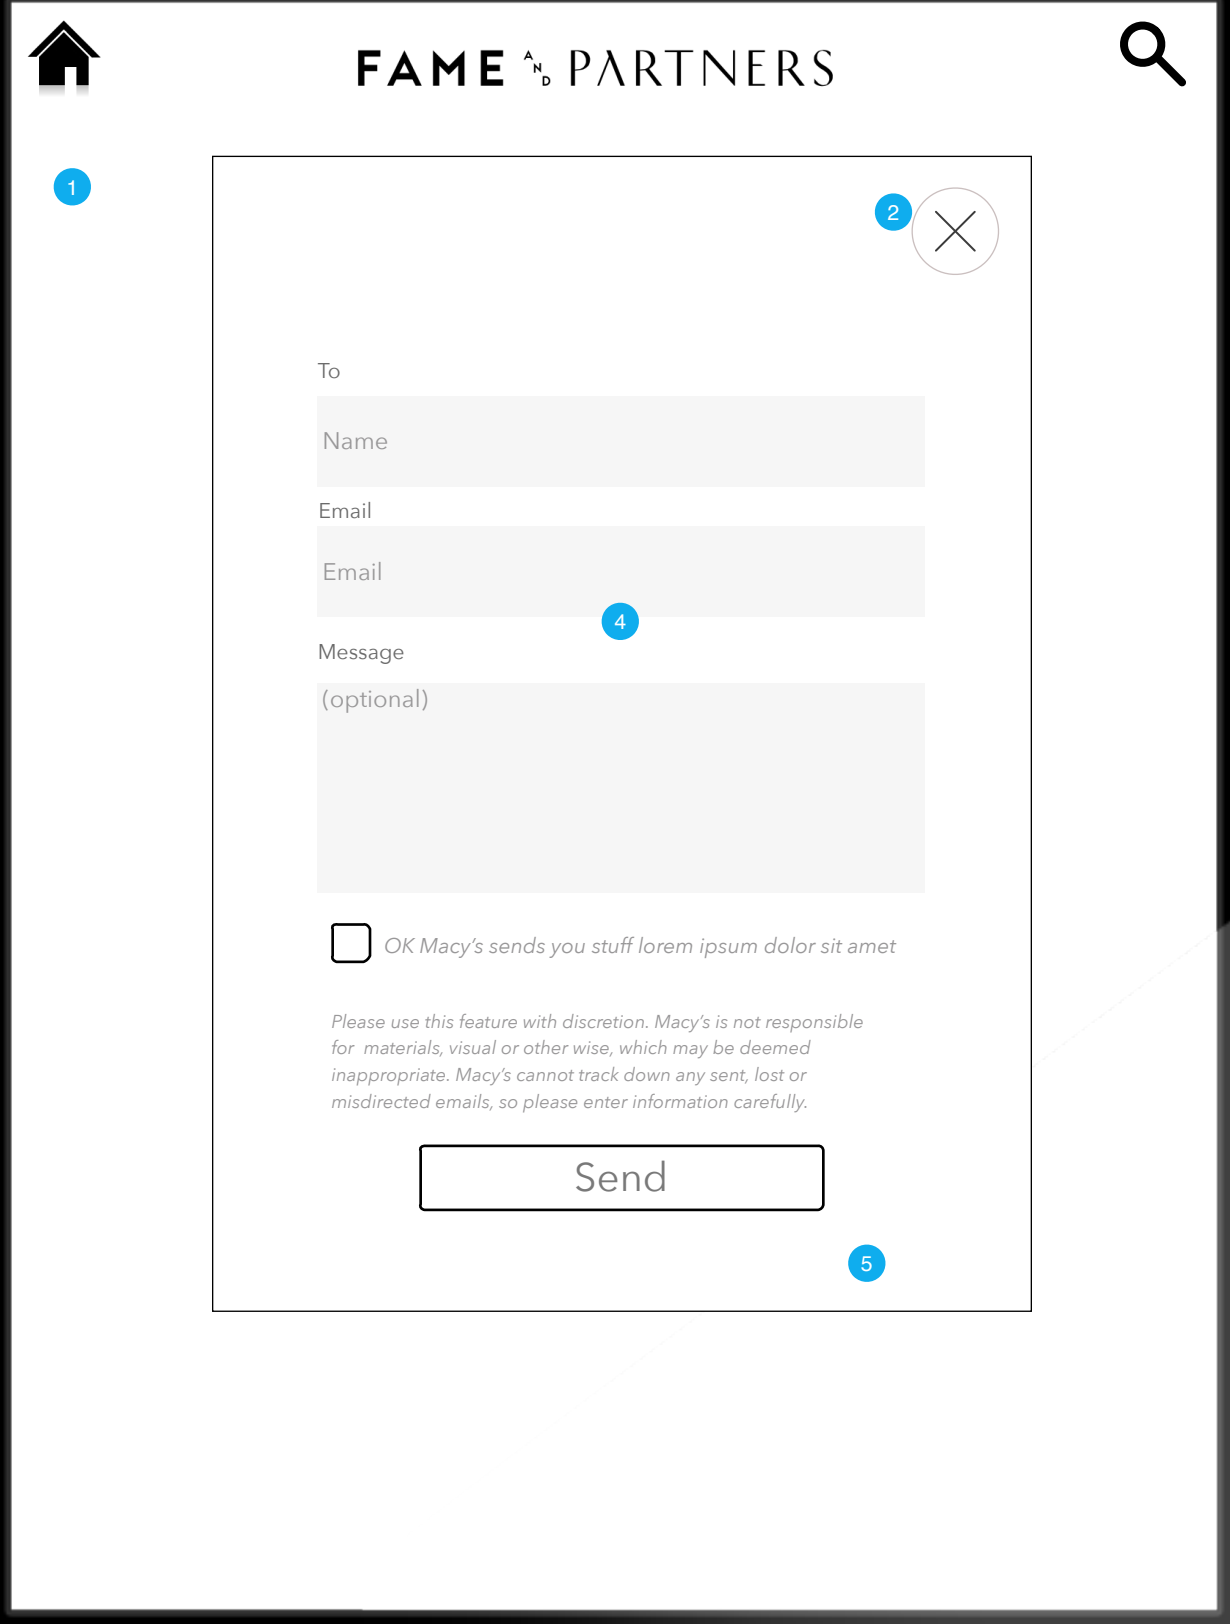

3.1.0.2 Color

Page Title		
3.1.0.2 Color		
Page Context		
Color overlay allows the user to choose color of dress. Some colors have corresponding photographs, some do not.		
Page Notes		
#	Interface Description	Interaction
1	Close X	On press, the overlay is removed.
2	Color chips (photo available)	On press, if photo available, the dress photo behind changes to the selected color.
3	Color chip (no photo available)	On press, since no corresponding photo available, the photo does not change and a message appears explaining it.

Page Title		
3.1.0.3 Customizations		
Page Context		
Customizations overlay allows up to three customizations the user can apply to their dress.		
Page Notes		
#	Interface Description	Interaction
1	Close X	On press, the overlay is removed.
2	Customization	An image showing the experience is shown, followed by a text description below. On press, the customization is applied to the dress and a visible change is made in the image (checkmark?). NOTE: some customizations nullify the other options (i.e. short sleeves turns off long sleeves.)
3	Price	On change of customization, if there is a price associated, the Subtotal should be updated.

3.1.1 Share Dress

Page Title

3.1.1 Share Dress

Page Context

This is an overlay that allows the user to share a dress either to their phone or to an email address. This should follow standard overlay design when decided.

Page Notes

#	Interface Description	Interaction
1	Overlay	See overlay design for design/size details.
2	X	On press, overlay is dismissed.
3	Barcode	Barcode with information on the dress or page in question encoded as text/url (TBD).
4	Form	On focus of form, inserted label is removed and keyboard is called. Max character count for name is 70 characters. Email should be tested to ensure validity.
5	Send	On press, form is checked for validity. If valid, overlay displays a thank you message in place of form.

[Shop for this dress at macys.com](#)

I would like to have Macy's send me marketing emails.

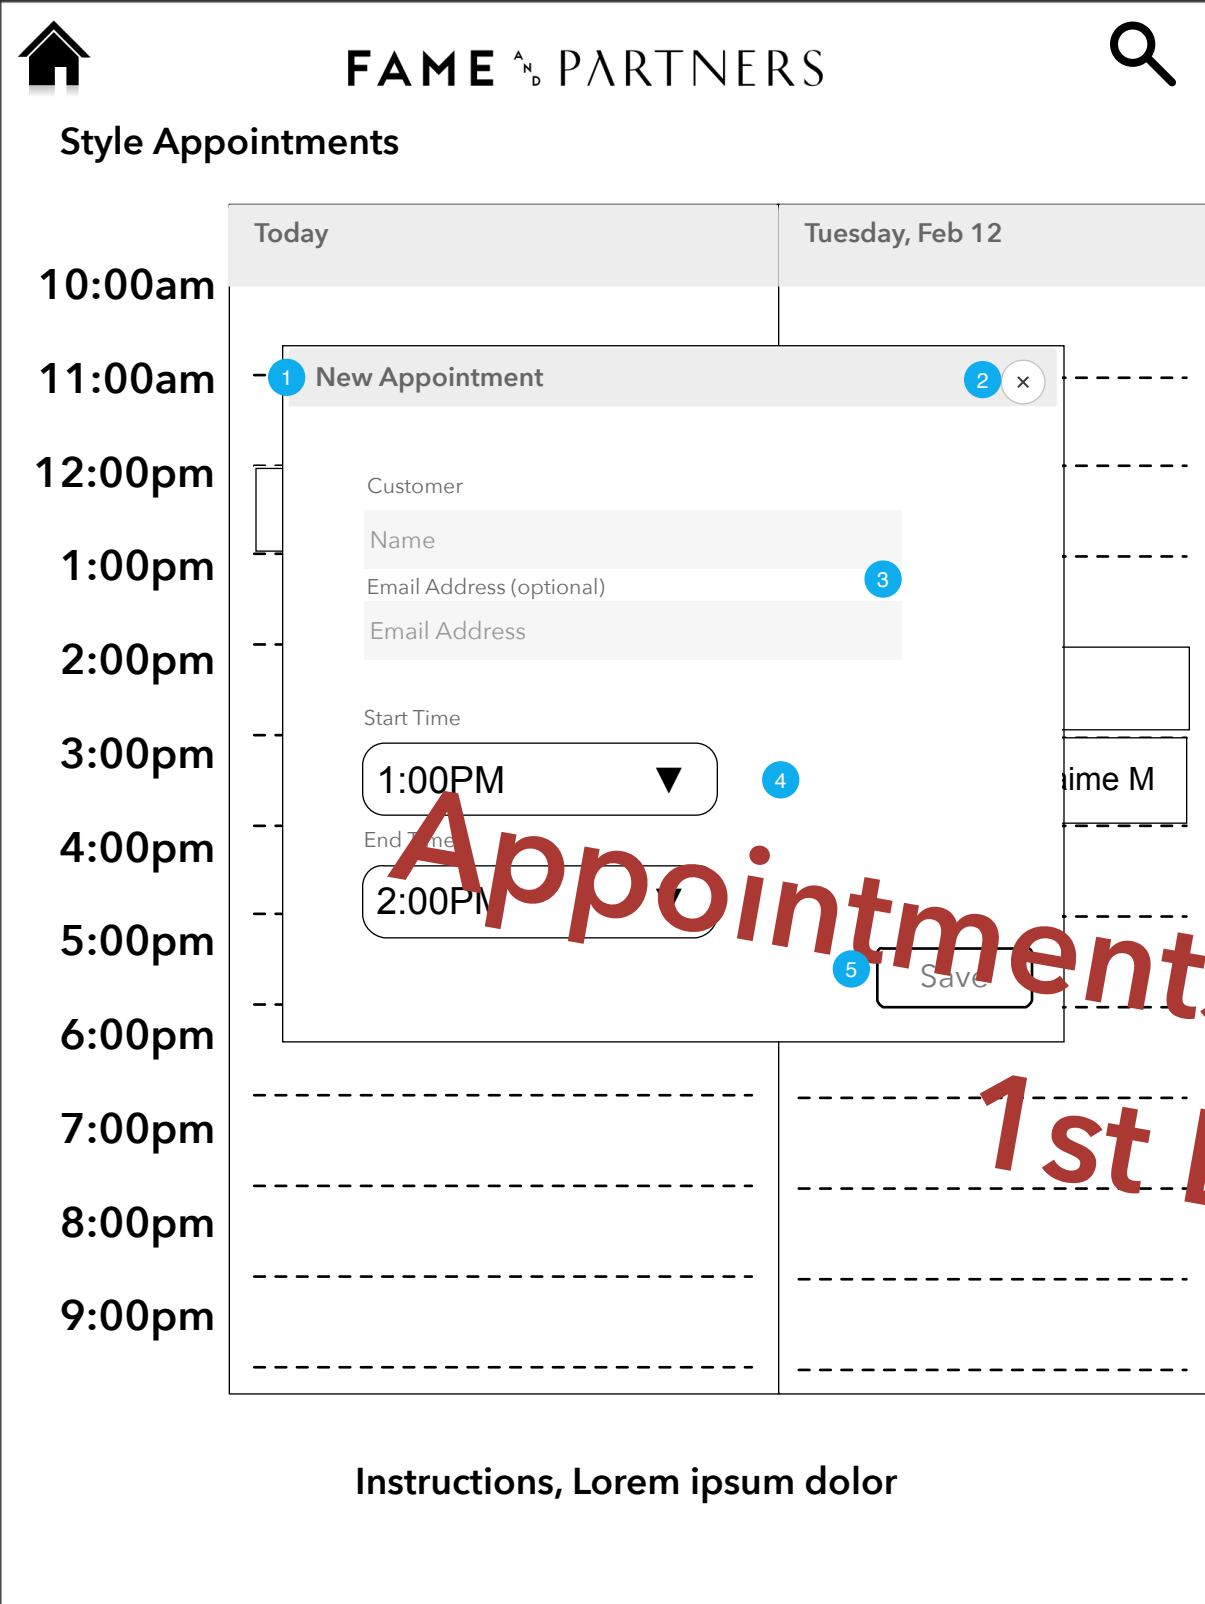

Subscribe

This is the email that is shared with the customer when they share a specific dress.

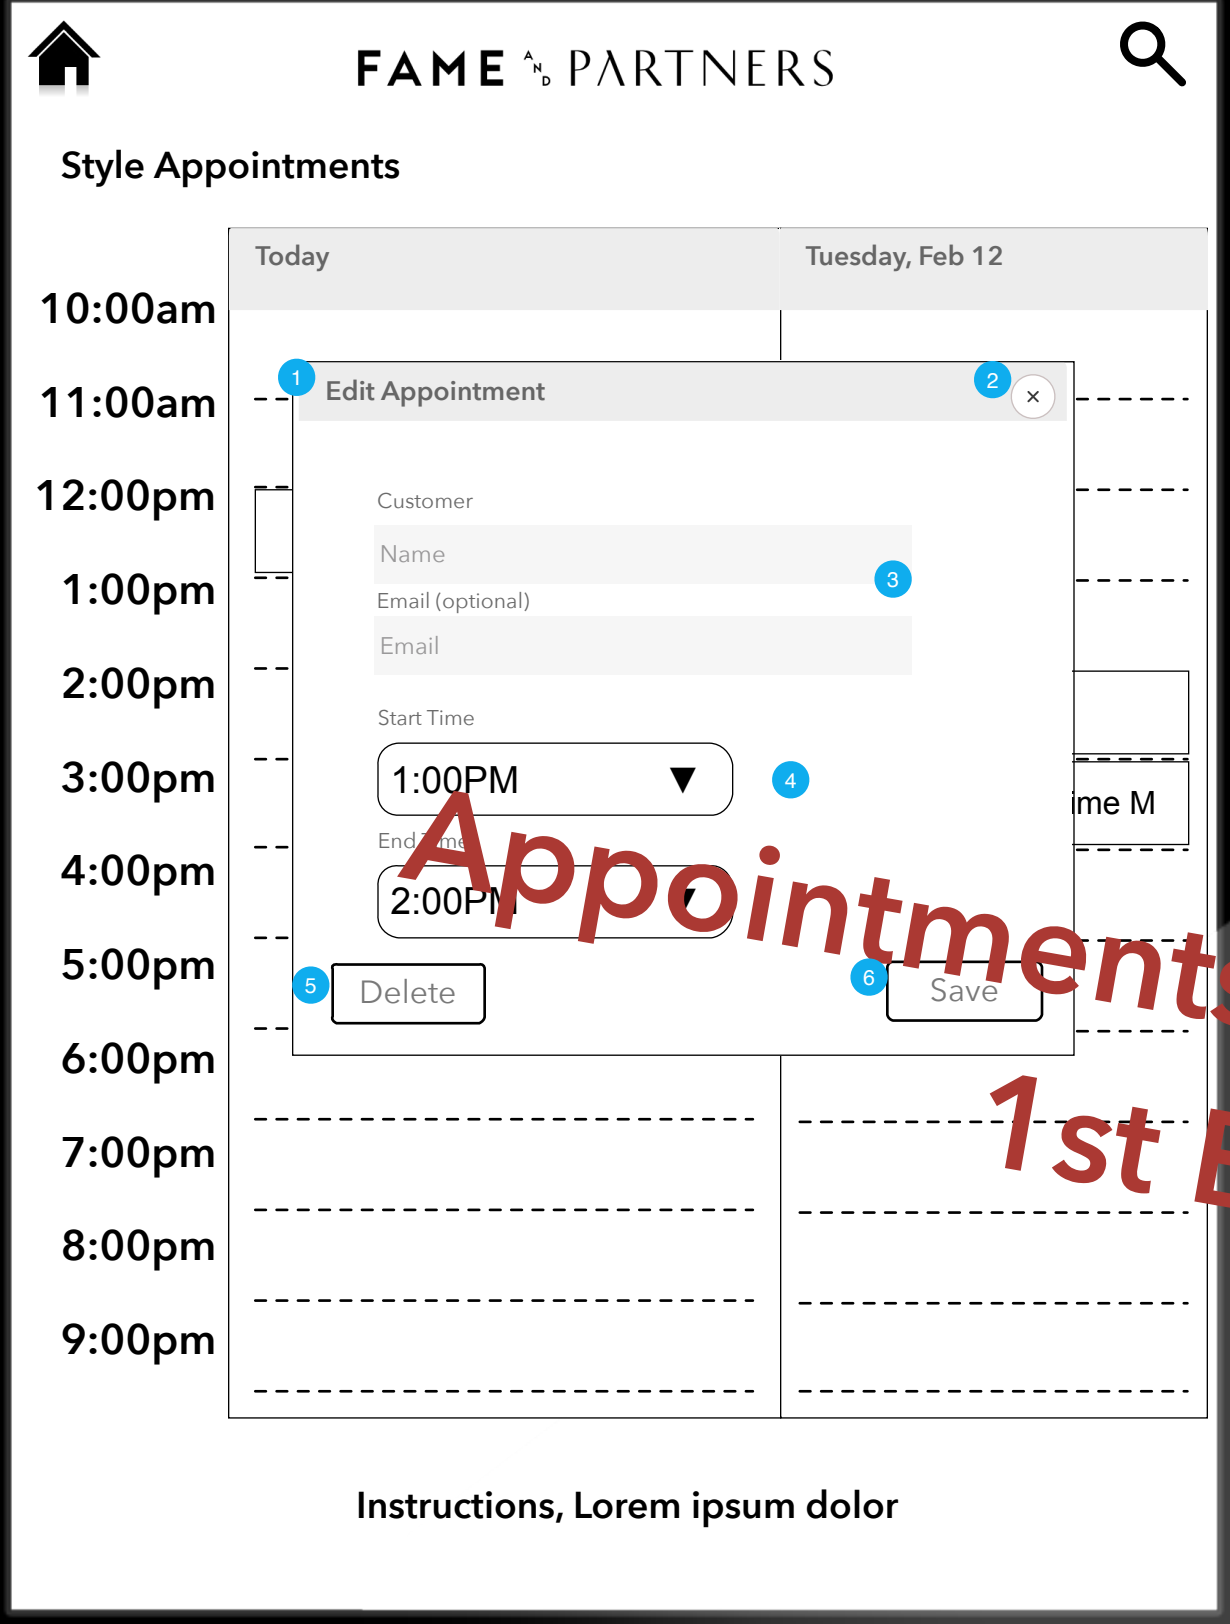

Page Notes		
#	Interface Description	Interaction
1	Email	This is an email interface. It must be designed per email guidance (amorphous size, readable without images, etc.)
2	Header	Content of e-mail header will be the logos, the name of the dress shared and a quick reminder/intro sentence.
3	Dress Detail	The dress shared is reiterated so the user can confirm their choices when they get to macyst.com.
4	Dress Photo	An image of the chosen dress is shown.
5	Link	A link to macys.com - deep linked to the PDP for that dress.
6	Marketing Opt-in	A marketing opt-in line is included in the e-mail.
7	Subscribe Button	On press, the user's subscription choice is sent to macys.com/.

Page Title		
4.0 View Appointments		
Page Context		
This is the interface for appointment setting, editing and deleting. It is available to the associates and the public.		
Page Notes		
#	Interface Description	Interaction
1	Calendar	Appointments are shown in a calendar with the available times listed down the left. The calendar can be swiped left (older) or right (newer days).
2	Times	The column of times does not move but appears over the calendar.
3	Today	When opened, the calendar interface shows today aligned to the times to the left. On press of an open time slot, a new appointment form is opened.
4	Appointment	On press of an existing appointment, the appointment editing overlay is shown. In addition, on drag to new time slot, the appointment is rescheduled.
5	Double booking	The Associates have the opportunity to double or triple book appointments by creating an appointment and then sliding it into the occupied time. Max number of simultaneous appointments is set in Settings.

Page Title		
4.1 New Appointment		
Page Context		
New Appointment Overlay. This is the overlay to allow associates and/or customers to create a style appointment.		
Page Notes		
#	Interface Description	Interaction
1	Overlay	This overlay follows the overlay design standard (TBD).
2	X	On press, the overlay is closed.
3	Name and Email	On focus, in field label is removed and keyboard is called.
4	Time dropdown	On focus, the time clicked on to open this dialog box is filled in (one hour) by default. The user is able to choose another time. Default appointment length is one hour.
5	Save	On press, the form is validated and on success, the appointment is created, placed in the calendar, and the overlay is removed.

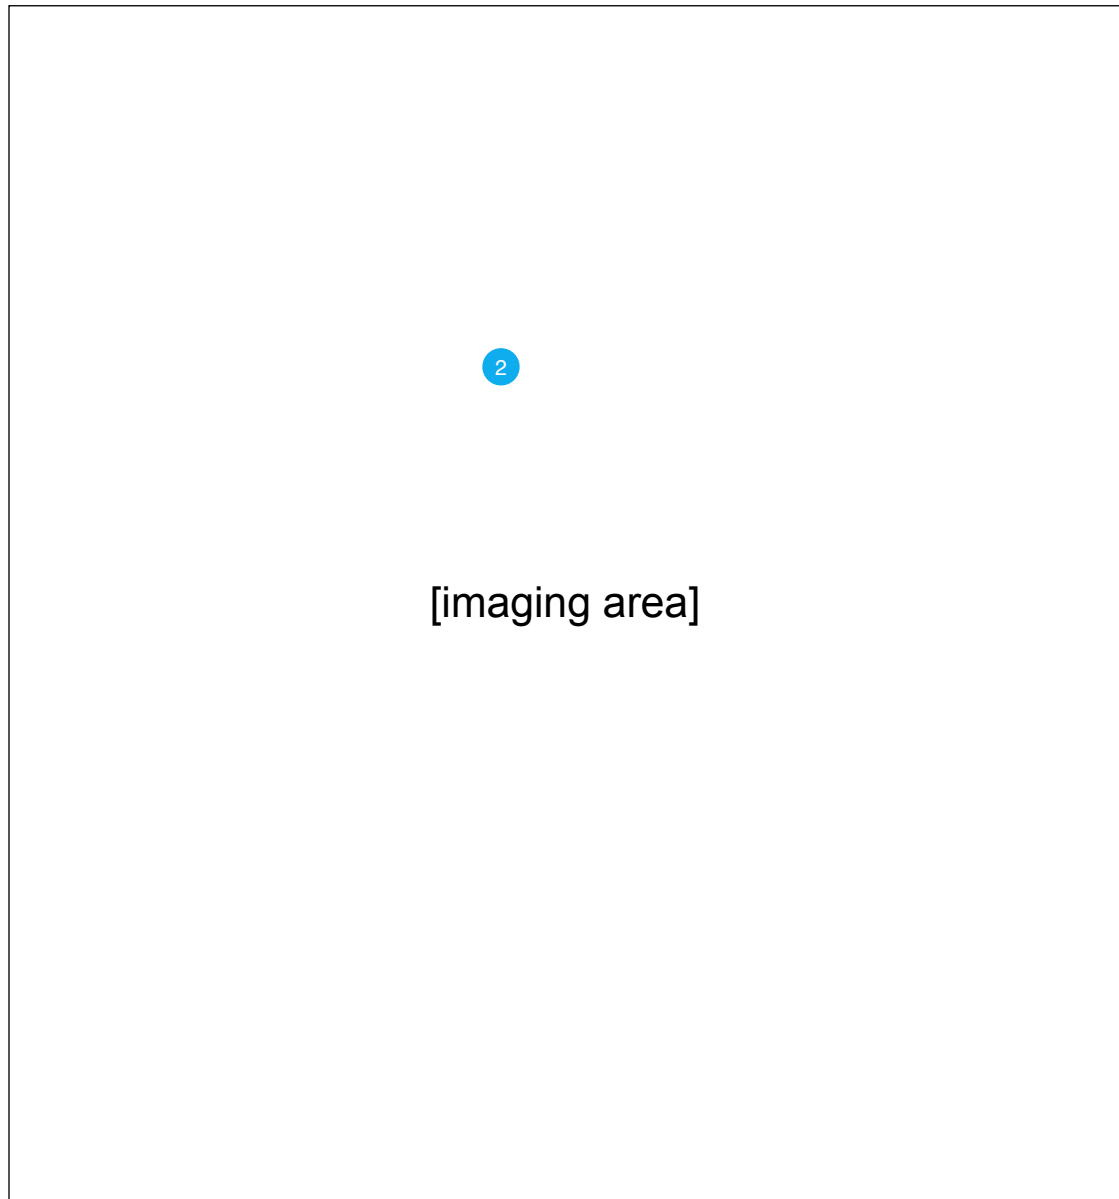

Page Title		
4.2 Edit Appointment		
Page Context		
Edit appointment is called when the user clicks on an existing appointment. It differs from the New Appointment in that the appointee name, email and time are pre-filled.		
Page Notes		
#	Interface Description	Interaction
1	Overlay	This overlay follows the overlay design standard (TBD).
2	X	On press, the overlay is closed.
3	Name and Email	On focus, in field label is removed and keyboard is called.
4	Time dropdown	On focus, the time clicked on to open this dialog box is filled in (one hour) by default. The user is able to choose another time. Default appointment length is one hour.
5	Delete	On press, the appointment is deleted, removed from the calendar, and this overlay is closed. NOTE - Delete requires authentication as an associate (see 7.0 Settings).
6	Save	On press, the form is validated and on success, the appointment is created, placed in the calendar, and the overlay is removed.

Page Title

5.0 Scan Bar Code

Page Context

This interface is shown when the user clicks on "Scan" on the home page.

Page Notes

#	Interface Description	Interaction
1	Arrow	Assuming the app uses the forward facing camera, this arrow will point to the camera lens so the user can find it. No direct interaction is planned.
2	Screen Area	The live feed from the camera is shown in the box. On successful acquisition of a barcode, the screen freezes momentarily and the system reads the barcode. If the barcode is readable, the interface goes to the dress found. If no dress found, the interface shows an error (5.1 Scan Error). If the barcode is not readable, the image returns to live camera feed and again attempts to acquire a barcode.

1 Hold the tag
6" from camera to scan.

Keep tag still, scan will be automatic
lore ipsum dolor sit
met consectetur elit eram toroid lu peperi

[imaging area]

The scanned number does not correspond
to a known product. 2

Page Title

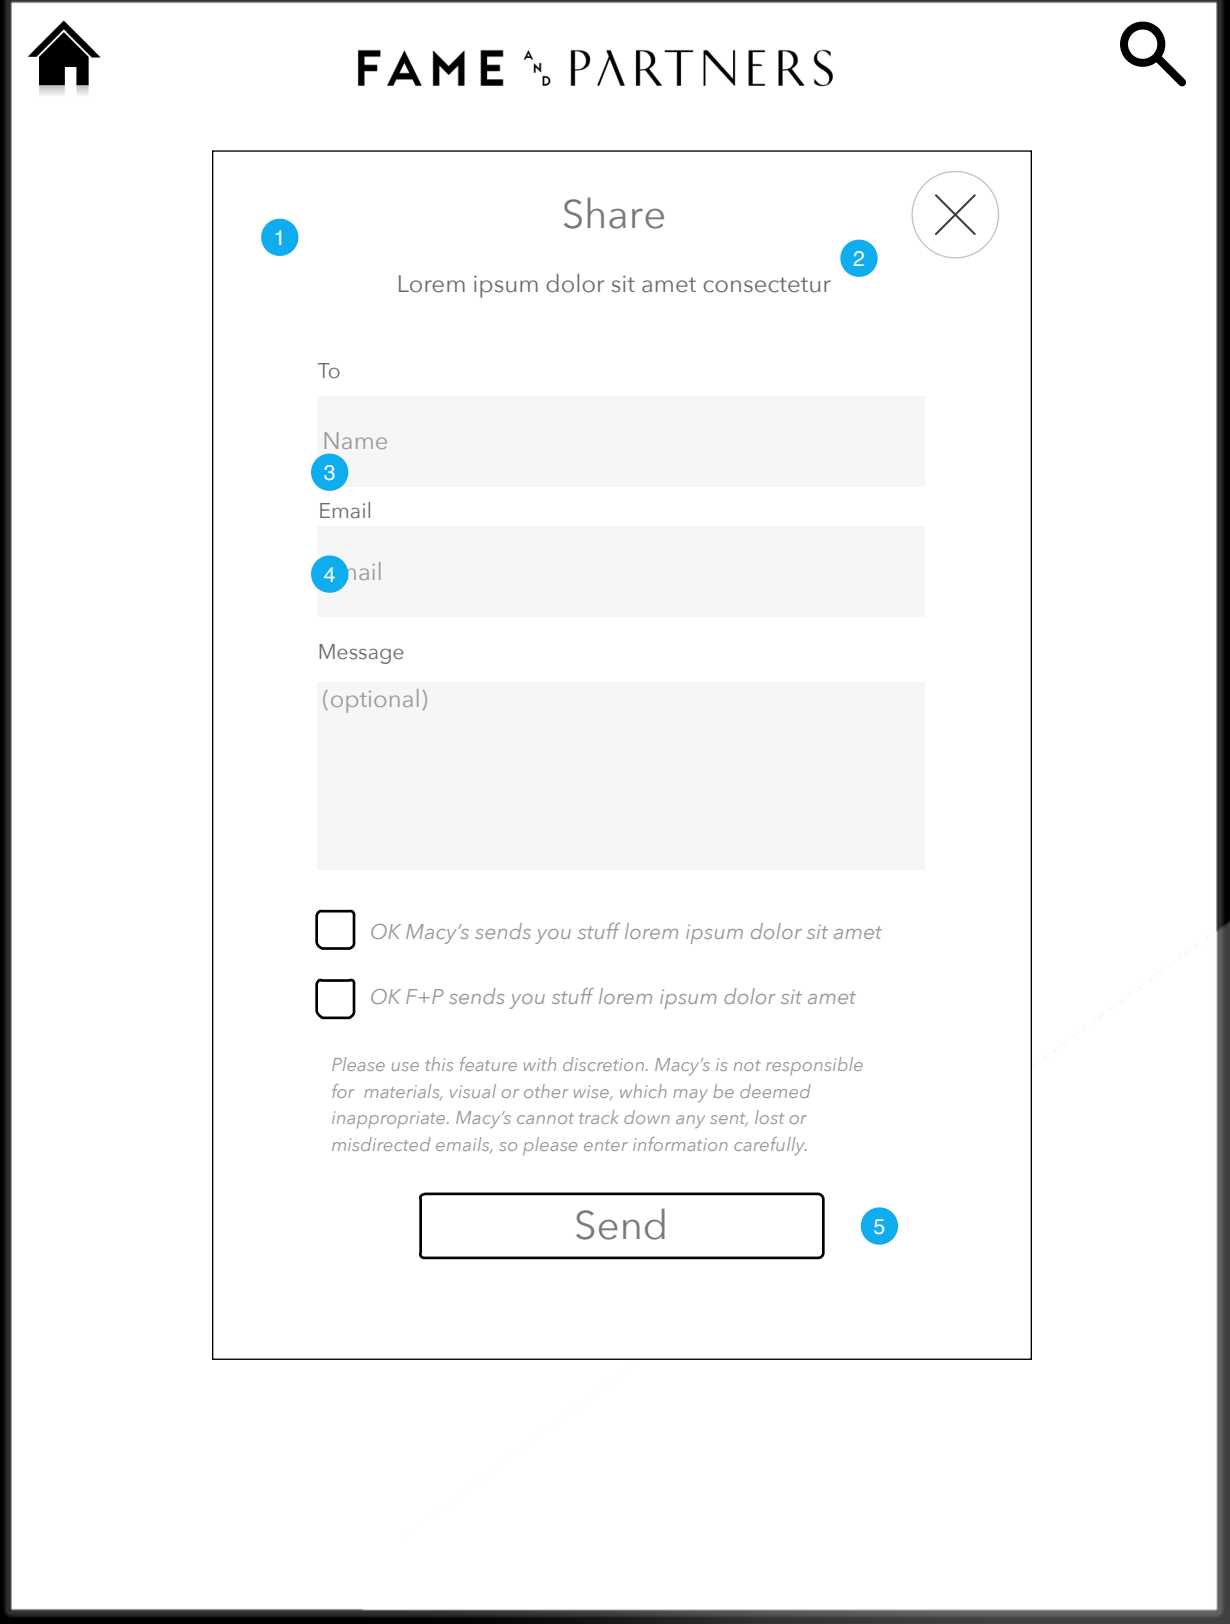

5.1 Scan Error

Page Context

This interface is shown when the user scan succeeds in acquiring a barcode but that barcode doesn't correspond to a product.

Page Notes

#	Interface Description	Interaction
1	Arrow	Assuming the app uses the forward facing camera, this arrow will point to the camera lens so the user can find it. No direct interaction is planned.
2	Error	Error message is shown when the scanner acquires a barcode but the barcode does not correspond to a known dress. Error message is shown for 30 seconds as the camera again tries to reacquire a barcode. The message then fades.

Interface for 3.1.1 Share Dress and 6.0 Share are identical. This separate interface is maintained for sharing from Quiz Results. The interface and all functionality are the same, only the message (not seen) is different.

Page Title		
6.0 Share Page/Collection		
Page Context		
This is a universal share overlay. It can be called to share nearly any page/image/content. The content shared is not shown.		
Page Notes		
#	Interface Description	Interaction
1	Overlay	This overlay design will follow the standard design to be determined.
2	X	On press, the overlay is closed.
3	Name	On focus, the in field label is erased and the keyboard is called. Min length 2, max length 70.
4	Email	On focus, the in field label is erased and the keyboard is called. Must include @ symbol and end in Top Level Domain.
5	Send	On press, form is tested for validity. If valid, form is processed and a message confirming share is shown in place of the form.

3	Save	On press, valid new password is changed, dialog box changes to success message.

8.0 TimeoutScreen

Page Title		
8.0 TimeoutScreen		
Page Context		
After an amount of inactive time (TBD) the session is suspended but recallable. The screen will change to this interface allowing the user to continue their session or to start a new session.		
Page Notes		
#	Interface Description	Interaction
1	Page	Page will be similar to the Attract Loop that is part of the system.
2	Timeout message	A message explaining what happened to the session is shown at top. This message will warn the user that she might lose any previous work.
3	Continue with Session	On press, screen goes back to previous screen (which could be any screen in the app).
4	New Customer	On press, the user session is created anew. All previous work is (TBD) either removed to records for statistics or lost.
